UNION GEAR HANGERS

How to find the right gear hanger? Just scroll down the table at the top of this page, and find your bike brand. After selecting your bike brand, we show you all the gear hangers we carry in our range, fitting models from this bike brand. By clicking on one of the pictures, you can see more details.

If your bike brand is not listed, you can select all our gear hangers by the hanger assembly style.

For the most common bike brands you can also select your hanger from the complete model list.

 In this catalogue we selected for you the 140 most common bike brands and show you all the gear hangers we have available for these bike brands, with photos at scale 1:1.

If you can't find the hanger in this catalogue, just check our website for:

1. Many more bike brands
2. New hangers that we add frequently
3. Search for the hanger assembly style

DISC BRAKE PADS

WITH COOLING FINS

DISC BRAKE PADS WITH COOLING SYSTEM

Disc Brake Pad Cooling System

- Substitute your standard disc brake pad with a cooling system
- The cooling fins help to prevent heat build-up by improving the heat dissipation and reduce the brake-pad surface temperature by 50°C
- Also the temperature of the hydraulic oil will be reduced
- No brake power fading due to overheated brake pads or hydraulic oil
- Exactly the same specifications as originally supplied, ensuring consistent performance
- Brake pad compound with high friction coefficient that offers consistent and smooth braking power

Scheibenbremsbeläge mit Kühlrippen

- Tausche Deine Standard-Bremsbeläge gegen ein selbstkühlendes System
- Die Kühlrippen helfen einen Wärmestau zu verhindern in dem sie die Wärmeableitung verbessern und somit die Bremsbelag-Oberflächentemperatur um 50°C reduzieren
- Ebenso wird die Temperatur des Hydrauliköls reduziert
- Keine Bremswirkungsverluste durch Überhitzung der Bremsbeläge oder des Hydrauliköls
- Alle Spezifikationen sind identisch zu den Originalteilen und garantieren eine konstante Bremsleistung
- Bremsbelag Zusammensetzung mit hohem Reibungskoeffizienten ermöglicht eine gleichbleibende, ruckfreie Bremskraft

Plaquettes de frein "Cooling"

- Remplacer vos plaquettes de freins standards par des plaquettes avec système "Cooling"
- L'ailette de refroidissement aide à prévenir l'accumulation de chaleur en améliorant sa dissipation et en réduisant la température de la surface de la plaquette de frein de 50°C
- La température du liquide de frein diminuera elle aussi
- Aucune diminution de la puissance de freinage due à des plaquettes ou à du liquide de frein surchauffés
- Leurs caractéristiques sont absolument identiques à celle d'origine, assurant une performance constante
- Plaquette de frein avec fort coefficient de friction qui offre une puissance de freinage constante et progressive

Schijfremblokjes met koelribben

- Vervang je standaard schijfremblokjes door blokjes met een koelsysteem
- De koelribben zorgen voor een goede koeling zodat de temperatuur van het oppervlak van de remvoering met 50°C daalt
- Ook de temperatuur van de hydraulische olie wordt gereduceerd
- Dus geen verlies aan remkracht door oververhitte remvoering of remolie
- Alle specificaties zijn identiek aan de origineel gemonteerde remvoering, voor perfecte remprestaties
- Remvoering compound met een hoge weerstandscoëfficiënt, voor konstante remkracht
